RACE & ETHNICITY DATA

TIER 1 METRICS & BREAKDOWNS

Justice Counts follows federal guidance on data for race and ethnicity, treating them as distinct traits (i.e., a person has both a race and an ethnicity, and one does not necessarily dictate the other). For more information on how the federal government, including the U.S. Census Bureau, categorizes race and ethnicity, see [Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity](#), [U.S. Census Bureau Guidance on the Presentation and Comparison of Race and Hispanic Origin Data](#), and [About the Hispanic Population and its Origin](#).

The categories and descriptions below are based on race and ethnicity definitions in [U.S. Census Bureau - About the Topic of Race](#).

Race Categories

- **American Indian or Alaska Native:** People whose race is listed as Native American, American Indian, Native Alaskan, or similar. This includes people with origins in the original populations or Tribal groups of North, Central, or South America.
- **Asian:** People whose race is listed as Asian. This includes people with origins in China, Japan, Korea, Laos, Vietnam, as well as India, Malaysia, the Philippines, and other countries in East and South Asia.
- **Black:** People whose race is listed as Black or African-American. This includes people with origins in Kenya, Nigeria, Ghana, Ethiopia, or other countries in Sub-Saharan Africa.
- **Native Hawaiian or Pacific Islander:** People whose race is listed as Native Hawaiian, Pacific Islander, or similar. This includes people with origins in the original populations of Pacific islands such as Hawaii, Samoa, Fiji, Tahiti, or Papua New Guinea.
- **White:** People whose race is listed as White, Caucasian, or Anglo. This includes people with origins in France, Italy, or other countries in Europe, as well as Israel, Palestine, Egypt, or other countries in the Middle East and North Africa.
- **More than one race:** People whose race is listed as more than one race, such as White and Black.
- **Other race:** People whose race is listed as some other race, not included above.
- **Unknown race:** People whose race is not known.

Ethnicity Categories

- **Hispanic or Latino:** People whose ethnicity is listed as Hispanic or Latino. This includes people with origins in Mexico, Cuba, Puerto Rico, the Dominican Republic, and other Spanish-speaking countries in Central or South America, as well as people with origins in Brazil or other non-Spanish-speaking countries in Central or South America.
- **Not Hispanic or Latino:** People whose ethnicity is not listed as Hispanic or Latino.
- **Unknown ethnicity:** People whose ethnicity is not known.

For race and ethnicity metrics, the data shared should be categorized by the distinct combination of race and ethnicity as seen in the table below. It is possible that this metric could have up to 24 unique racial and ethnic combinations. But, during onboarding, agencies will specify which of the combinations of race and ethnicity are available to be shared from their data systems.

	Hispanic or Latino	Not Hispanic or Latino	Unknown ethnicity
American Indian or Alaska Native	A	I	Q
Asian	B	J	R
Black	C	K	S
Native Hawaiian or Pacific Islander	D	L	T
White	E	M	U
More than one race	F	N	V
Other race	G	O	W
Unknown race	H	P	X

BIOLOGICAL SEX DATA

TIER 1 METRICS & BREAKDOWNS

Justice Counts currently uses biological sex (male, female, unknown) in lieu of gender identity. Justice Counts is working to determine the best way to account for gender identity through this initiative. More information is forthcoming.

Justice Counts recognizes that there is significant variation across criminal justice agencies and courts for how, when, and by whom those data are collected and recorded. Therefore, in addition to configuring biological sex, agencies should also share information regarding the method of data collection for biological sex, such as if the agency inherits data on biological sex from another agency and they are applied unchanged, if the agency inherits data on biological sex from another agency that are amended upon receipt by the agency, or if biological sex is directly collected and recorded by the agency.

If an agency directly collects biological sex data, the agency should also indicate if the agency makes a determination about a person's biological sex, if the person self-identifies their biological sex, or if the method of data collection is unknown.

This project was supported by Grant No. 2019-ZB-BX-K005 awarded by the Bureau of Justice Assistance. The Bureau of Justice Assistance is a component of the Department of Justice's Office of Justice Programs, which also includes the Bureau of Justice Statistics, the National Institute of Justice, the Office of Juvenile Justice and Delinquency Prevention, the Office for Victims of Crime, and the SMART Office. Points of view or opinions in this document are those of the author and do not necessarily represent the official position or policies of the U.S. Department of Justice.
